

Performance Data

BasicBlack05 LA 05 BK SR HPR

Solar Energy Transmission	43 %
Solar Energy Rejection	7 %
Solar Energy Absorption	50 %
Visible Light Transmission	7 %
Visible Light Rejection	5 %
Ultraviolet Transmission	< 5 %
Total Solar Energy Rejection	44 %

Features & Benefits

Adds value, dramatically increasing the looks of your vehicle.

Provides improved privacy.

Cuts excess summer solar heat through the glass, which helps to maintain lower internal temperatures easing the load on air conditioning, thereby reducing energy costs.

Cuts glare down, reducing eyestrain.

BasicSeries
★★★★★

Note: Please check with local and national legislation and/or police authority regarding visible light transmissions on vehicle windows.

Performance Data

BasicBlack15 LA 15 BK SR HPR

Solar Energy Transmission	47 %
Solar Energy Rejection	7 %
Solar Energy Absorption	46 %
Visible Light Transmission	17 %
Visible Light Rejection	6 %
Ultraviolet Transmission	< 5 %
Total Solar Energy Rejection	41 %

Features & Benefits

Adds value, dramatically increasing the looks of your vehicle.

Provides improved privacy.

Cuts excess summer solar heat through the glass, which helps to maintain lower internal temperatures easing the load on air conditioning, thereby reducing energy costs.

Cuts glare down, reducing eyestrain.

Performance Data

BasicBlack35 LA 35 BK SR HPR

Solar Energy Transmission	56 %
Solar Energy Rejection	8 %
Solar Energy Absorption	36 %
Visible Light Transmission	36 %
Visible Light Rejection	6 %
Ultraviolet Transmission	< 5 %
Total Solar Energy Rejection	34 %

Features & Benefits

Adds value, dramatically increasing the looks of your vehicle.

Provides improved privacy.

Cuts excess summer solar heat through the glass, which helps to maintain lower internal temperatures easing the load on air conditioning, thereby reducing energy costs.

Performance Data

BasicBlack50 LA 50 BK SR HPR

Solar Energy Transmission	60 %
Solar Energy Rejection	8 %
Solar Energy Absorption	32 %
Visible Light Transmission	49 %
Visible Light Rejection	6 %
Ultraviolet Transmission	< 5 %
Total Solar Energy Rejection	29 %

Features & Benefits

Adds value, dramatically increasing the looks of your vehicle.

Provides improved privacy.

Cuts excess summer solar heat through the glass, which helps to maintain lower internal temperatures easing the load on air conditioning, thereby reducing energy costs.

Cuts glare down, reducing eyestrain.

Performance Data

BasicBlack70 LA 70 BK SR HPR

Solar Energy Transmission	73 %
Solar Energy Rejection	11 %
Solar Energy Absorption	16 %
Visible Light Transmission	71 %
Visible Light Rejection	11 %
Ultraviolet Transmission	< 5 %
Total Solar Energy Rejection	23 %

Features & Benefits

Adds value, dramatically increasing the looks of your vehicle.

Provides improved privacy.

Cuts excess summer solar heat through the glass, which helps to maintain lower internal temperatures easing the load on air conditioning, thereby reducing energy costs.
